EXPERIENCE

Thinkful: (2018-2019)
Engineering Immersion Student

Learned industry best practices and practical software development standards with a focus on HTML/CSS, JavaScript, jQuery, Node.js, React, Redux, and algorithms & data structures.

Intensive one on one training

Worked on a team of 18 people with 100+ hours of peer programming. Created and deployed mobile-first applications while learning new languages and frameworks by collaborating several hours every day with a senior web developer and team members.

Enterprise Solution Provider: (2018)
Full Stack Developer

My role was to familiarize myself with the code base and implement various improvements to the API as well as a file uploading option for users. Working with Angular and Golang.

RECENT PROJECTS

Helpful

Platform for volunteer networking (2019)

As Project Manager I lead the team to a successful deployment of Helpful. A platform designed to give an edge to volunteer organizations and people looking to start volunteering built with Mongo, Node, and React.

Double Jump

Marketplace for electronics (2018-2019)

An ecommerce application that utilizes Paypal payment processing as well as a file download system built with React/Redux, Node, and Mongo.
